

Logo Bibliography

Terrapin maintains a bibliography of books published about Logo, beginning with the books in our own library. The list below consists of Logo books of which we are aware and can serve as a starting point for research on Logo history and development and a source of ideas for Logo projects.

The entries are listed alphabetically by last name of the first author. If an entry carries a check mark next to the language, we have the book in stock.

Terrapin would like to make this Logo bibliography as comprehensive as possible. If you have or know of Logo books that should be added, please [contact us](#) and we will be happy to include them.

Author(s)	Title	Publisher	Copyright Year	Language
Abelson, Harold	Logo for the Apple II	BYTE/McGraw Hill	1982	English
Abelson, Harold and Abelson, Amanda	Turtle Geometry	Paradigm Software	1992	English
