

Blue-Bot is Bee-Bot with a Bluetooth connection which allows programming the robot remotely as well as via the on-board keys. Use the command keys on its back to send **Blue-Bot** forward and back, left and right and teach sequencing, directionality, problem-solving, counting, and estimation. Take **Blue-Bot** to the next level by controlling it remotely with the Tactile Reader or the free app on iPads or Android tablets, Windows or Mac PCs.
