

InO-Bot is the Logo turtle come to life! Bring programming off the screen by sending Logo commands that the screen turtle and **InO-Bot** follow at the same time. **Terrapin Logo** has been optimized to smoothly interact with the robot and is included. Use **InO-Bot**, to draw on paper or dry erase mat. The Logo environment, always exciting and motivating for students, becomes even more so with an actual turtle robot running around!

InO-Bot
