

# Liberty-Benton Elementary School

Bee-Bots are used in weekly computer classes from second through fifth grades at Liberty-Benton Elementary School near Findlay, OH. Computer instructor Nancy Cramer uses Bee-Bot to teach problem-solving and logical reasoning and has found the little robots to be applicable in a wide variety of activities. "Students love using Bee-Bots and anxiously look forward to the next opportunity," she says.

Two Bee-Bots navigate the food maze Bee-Bots turned out to be stars of the annual Salvation Army Food Drive held at the school. Students constructed Bee-Bot mazes out of the items they brought in to donate to the food drive as pictured in the photos. Students earned the opportunity to navigate Bee-Bot through the maze by bringing in food items to donate to the drive. This motivated students to participate and, with the help of Bee-Bot, Liberty-Benton Elementary had the most successful food drive since they began the effort.
